

Uploading or Replacing Files

There may be cases where an author discovers an error in a manuscript file or where changes are otherwise required. If multiple files need to be changed or additional changes are required for other information, please refer to our Unsubmitting a paper page for guidance on how to return the paper to the author.

If only one or two files need to be swapped out however, please email manuscripts@sciencesocieties.org with the following information:

- The manuscript id
- Any files that need to be swapped
- Any other relevant information, such as what changes were made if the paper is already in review.

Please make sure that all file names are clear, either matching the original file names or clearly labeled (ex: Supplemental Table 1.docx or Fig 1).
